Result for : TV screen 75 inch

#	Icon or image	Name of the store	Address s	City	Price	Link of the store	Rating of the place	Options
1		XXX	XXX	Tel-Aviv	3200		3/5	delete Buy
2		XXX	XXX	Netanya	3000		2/5	delete Buy
3		XXX	XXX	Jerusalem	3340		1/5	delete Buy
4		XXX	XXX	Haifa	3100		5/5	delete Buy

1 - Create a table with **Bootstrap.**
   a) Add an icon or image of television in the "Icon or image" column, the size should fit in the grid.
   b) Add a link in the "Icon or image" column, choose a different link of your choice for each row, the link should be opened in a **new browser.**

2 - For each row, if the rating of the column "Rating of the place" is lower than 2, then all the background of the row should be red and if the rating is equal or bigger than 4 then the color of the background line will be green.

3 - Create a function that receives an array of objects (like in the table, each row is an object), the function should return the average price of all the rows.

4 - Create a function that receives an array of objects (like in the table, each row is an object), the function should return the best option for the user regarding the price and the rating. The function should return the id of the row, only if the price is the lowest and the rating is 4/5 or 5/5.

5 - Add a column of "Options".
   a) add a Bootstrap red button and write "delete" and blue button and write "buy".
      The two buttons **should be next to each other**.
   b) If the user clicks on the "delete" button, the row will be deleted.
   c) If the user clicks on buy then **a new page will be opened** with this form and button "Send".
      You have to choose the design and colors (HTML AND CSS)
      Use your imagination to make it pretty, you have to choose at least 5 properties in CSS.
      BONUS: elements/components of bootstrap.

Name of the store :	XXX
Price:	x $
Credit Card number :	xxx xxx xxx xxx
Date of expiration :	xx/xx/xxxx
